

IFKA Public Benefit Non-Profit Ltd. for the Development of Industry has been playing an active role in the economic, technical and innovational life of Hungary since 1990, bringing together the fields of logistics, quality assurance and environmental protection. Our extensive network allows us to operate as a bridging institution. IFKA accommodates both Hungarian and European Union objectives. We can bring considerable funding into play in the interests of our public benefit work. On the basis of experts and organisational competence we participate in the development of comprehensive domestic strategies. The benefits of our programmes are used both at national and international level.
